Discussion

The RSOP Notification Letter for Component Removal, Size Reduction, and Decontamination Activities (RSOP) for RCRA Unit 39 and 40 Final Closure in Building 444/447 states that RCRA Unit 40.04 (T2) and Unit 40.05 (T3) will be closed under Section 5.1.1, "Clean Closure". We would like to change the strategy to "closure by removal". The rinsate did not exceed appropriate limits for RCRA, so the tank and its contents will be designated as LLW. The analytical data package for the tank sludge and final rinse was provided to the State (Kruchek). The State concurred that, based on the data provided, the tanks could be removed.

However, he noted that the secondary containments for the tanks (e.g., concrete slabs) were not covered by this concurrence.
